Immutable V10 / R9 inputs + SHA-256 inventory
G0 replay gate: exact counts / numeric tolerance 1e-12
R1 PLAN LOCK before new outcomes
E0X exposure gate
No untouched cohort certified
Opened E1 / C1 diagnostics
E1–E4, E6–E8
E5 architecture feasibility
Full cohort blocked by calibration support
Entity / site / synchronous time-block outputs
Independent arithmetic and mask checks
Reviewer evidence + integration notes + reproducibility bundle
